Depart from Taipei City in the morning and drive to the Sun Moon Lake National Scenic Area located in the center of Taiwan. Sun Moon Lake is the largest freshwater lake in Taiwan, bounded by Lalu Island. It is named after its unique topography. The east side is shaped like a sun wheel and the west side is shaped like a moon hook, hence the name Sun Moon Lake. The lake here is clear and green, surrounded by mountains, and the mountains and rivers correspond to each other. It also has unique human resources. The surrounding area is where Taiwan's original Thao people live. After lunch, we took a bus to tour along the lake and visited the most famous attractions here: Ita Shao Pier, Ci'en Pagoda, Xuanzang Temple, Wenwu Temple, etc... The temple buildings located on the lakeside and mountain scenery have a special solemn atmosphere. Follow the explanation of the professional tour guide and slowly visit and experience it in depth. I believe it will bring you different spiritual feelings. In the evening, enjoy the hotel facilities and spend a comfortable and peaceful night in a five-star hotel by the lake.

After breakfast, head to the south of the border - Kenting, which is definitely one of the best seaside resorts in Taiwan; it is also a paradise for international surfing and snorkeling enthusiasts.

Kenting National Park is the first national park established in Taiwan. It is located on the south side of the Hengchun Peninsula at the southern tip of Taiwan. It is surrounded by the sea on three sides and is the only tropical area on the island of Taiwan. Because of its special terrain, rich flora and fauna, and marine ecology, it has always been a popular tourist destination for nationals. Let us take you to visit some popular attractions in Kenting today!

First of all, the first attraction we visited was Mao Bitou. This strange-shaped stone is naturally occurring. The coral reef rock was formed by repeated wave erosion over a long period of time. From a distance, it looks like a giant sitting cat, hence its name.

Then visit the Sail Rock. The old coral reef that rolled down from the nearby platform to the seaside looks like the sail of a ship from a distance, so it is called the Sail Rock. Some tourists think that when viewed up close, it looks like the head of former U.S. President Richard Nixon, so it is also called Nixon’ s head.

Next is a popular tourist attraction that Kenting travelers will not miss: Eluanbi Lighthouse, located at Eluanbi Cape, Pingtung County, and is the southernmost lighthouse on Taiwan's main island. In the mid-19th century, the Qing Dynasty was built under diplomatic pressure. During the Japanese colonial period, it was listed as one of the eight major tourist attractions in Taiwan.

Finally, we arrive at Longpan Park, which is a limestone platform eroded by rain. There is an entire vast grassland in the vast park, facing the Pacific Ocean. Here you can feel the sea breeze and overlook the endless ocean, allowing you to experience the passion of the ocean in the southernmost part of Taiwan.

Then, drive to Taitung via the Nanhui Highway, enjoying the beautiful scenery and taking a break along the way.

Stay at Taitung Zhiben five-star hot spring resort tonight to experience the charm of Zhiben Hot Spring Resort. The hot springs here are weakly alkaline sodium bicarbonate springs, which can effectively improve blood circulation and relieve fatigue. Now that you're here, don't forget to soak in the hot springs to completely relax your body and mind.

Enjoying a morning without a morning call, the tour guide announced the gathering time and headed to the Sun Yat-Sen Memorial Hall, a comprehensive cultural memorial facility located in Taipei East District. It was built to commemorate the centenary of the birth of Sun Yat-sen, the founding father of the Republic of China. It was inaugurated on May 16, 1972. The total area of the museum area is 35,000 square meters. In addition to its commemorative function, the building itself is surrounded by a comprehensive leisure park for outdoor sports, leisure, arts and intellectual activities. Watch the handover ceremony of the Honor Guards of the three armed forces at this hour. After the ceremony, we drove to TAIPEI 101, located in the most elite area of Taipei. It is the largest engineering project in the history of the domestic construction industry. The project was mainly planned by Taipei Financial Tower Co., Ltd., a joint venture of 14 domestic companies, and professional teams at home and abroad. It was carefully designed by international architect Li Zuyuan. It transcended the design concept of a single volume and used the Chinese auspicious number "eight" (a homophone of "fa") as the design unit. Every eight floors is a structural unit, which are connected to each other and stacked layer by layer to form the whole. It forms a rhythmic beauty in appearance and creates a new style of international skyscrapers.
